

STONEHOLD

BECAUSE STONES BELONG TOGETHER

Thank you for your order! Here is how to get the best out of StoneHold.

What is StoneHold?

StoneHold is a water-based binder that holds loose decorative stone, gravel and mulch in place. No more stones rolling away and less mess, while rainwater still drains straight through.

Water based
ready to use

100% permeable
water drains freely

Stone, bark or mulch
from 4 to 20 mm

Apply in 5 steps

- 1 Spray**
Make sure the stones or mulch are clean and dry. Spray StoneHold evenly with a pressure sprayer, 15 to 20 cm above the stones. Generously, but without puddles.
- 2 Rake**
Gently turn the stones with a rake or hand trowel. The binder penetrates deeper and you avoid clumps.
- 3 Spray again**
Apply a second coat over the whole surface for a stronger bond.
- 4 Press**
Lightly press the surface flat with a hand trowel. Not too hard: just enough to set the stones.
- 5 Wait 24 hours**
Leave to dry for at least 24 hours and finish with a last, light coat.

Work safely

- May cause an allergic skin reaction (H317).
- Wear protective gloves. Avoid breathing spray.
- IF ON SKIN: wash with plenty of water.
- Keep out of reach of children. Keep children and pets off until the surface is dry.
- Safety data sheet: safety.resinmill.eu

What you need

Pressure sprayer
5 litres, with pump

Rake
to turn the stones

Hand trowel
to press the surface flat

Protective gloves
throughout the work

Good to know

- Work in dry weather.
- 2.5 L covers about 5 to 7 m², depending on the stone size.
- Suitable for decorative stone and gravel from 4 to 20 mm, bark and mulch.
- A firm, compacted base makes the surface last longer.
- For decorative areas and pedestrians, not for vehicles.

More than StoneHold

Resin Mill has everything for resin bound surfaces: permeable for outdoors, closed for indoors. For DIY and for professionals.

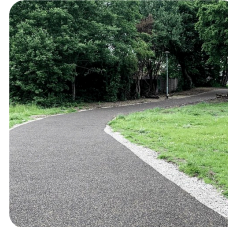

PERMEABLE for driveway, patio and garden

Stone carpet

RESIN BOUND

Natural stone from 1 to 5 mm, bound with UV-resistant resin. Seamless, permeable and in more than 25 colours. For driveways, patios and garden paths.

FlexiRox

STONE + RUBBER

Stone and rubber in one mix. Flexible, permeable and available as a ready-made kit in several colours.

Rubber Crumb & Rubber Mulch

RUBBER SURFACES

Soft, resilient rubber surfacing in EPDM or mulch. For play areas and paths, in many colours.

Bound Base PRO

BASE LAYER

The bound, permeable base layer under your stone carpet. With kits for pedestrian areas and for driveways.

NON-DRAINING for indoors and outdoors

Indoor stone carpet

CLOSED FLOOR

The same stone carpet, finished with a sealer that closes the pores. The result: a closed floor that is easy to keep clean.

Resin Bonded

RESIN BONDED, NON-DRAINING

Resin on a hard base, scattered with 1 to 3 mm stones. The look of gravel without loose stones. For driveways and paths.

Accessories & tools

EVERYTHING YOU NEED

Trowels, mixers, edge profiles, primers and sealers. Everything to install it yourself or as a professional.

We help you choose and install

Samples & sample cases
